COVID-19 (CORONAVIRUS DISEASE 2019)

May 8, 2020

Imperial County's Roadmap to Recovery

Overarching Themes and Resources to Guide Local Reopening Decisions

Theme 1: Local public health infrastructure to limit outbreaks

Theme 2: Local roadmap that outlines phased reopening of the economy to protect public's health while laying a strong foundation for long-term economic recovery

Imperial County - Stage 1

Stage 1: Safety and Preparedness

Make essential workforce environment as safe as possible (Physical and work flow adaption, essential work flow adaption, ensure PPE widely available, individual behavior changes)

Moving from Stage 1 to 2 (Low Risk)

Stage 2: Lower Risk Workplaces

Can open with modifications:

- Curbside retail, including but not limited to: Bookstores, jewelry stores, toy stores, clothing stores, shoe stores, home and furnishing stores, sporting goods stores, antique stores, music stores, florists.
- Supply chains supporting the above businesses, in manufacturing and logistics sectors

Moving to Stage 2 - Higher Risk

Local Variance

Counties can move more quickly through Stage 2, if our Imperial County Health Officer attests that the County meets the state's readiness criteria for containing COVID-19.

Readiness for Variance

- Demonstrate low COVID-19 prevalence and high level of readiness;
- Complete a written attestation; and
- Develop a containment plan in conjunction with the local hospitals and county stakeholders.

Readiness to Progress from Stage 2-Low Risk to Stage 2-Higher Risk

CRITERIA	METRICS
Epidemiological Stability	No more than 1 COVID-19 case per 10,000 in the past 14 days prior to attestation submission date No COVID-19 deaths in the past 14 days prior to attestation submission date
Protection of Essential Workers	Guidance for employers and essential critical infrastructure workplaces on how to structure the physical environment to protect essential workers Availability of supplies (disinfectant, essential protective gear) to protect essential workers
Testing	Minimum daily testing capacity of 1.5 tests/1,000 residents Testing availability for at least 75% of residents, as measured by a specimen collection site (including established health care providers) within 60 minutes driving time in rural areas

Readiness Criteria to Progress from Stage 2-Low Risk to Stage 2-Higher Risk

CRITERIA	METRICS
Containment Capacity	Sufficient Contact Tracing Staff. 15 staff/100,000 population Availability of temporary housing units for 15% of county residents experiencing homelessness and COVID-19 positive
Hospital Capacity	Hospital capacity to accommodate a minimum surge of 35% due to COVID-19 cases in addition to providing usual care for non-COVID-19 patients Hospital facilities have a robust plan to protect the hospital workforce, both clinical and nonclinical, with Personal Protective Equipment (PPE)
Vulnerable populations	Skilled nursing facilities (SNF) have >14-day supply of PPE on hand for staff Established process for ongoing procurement from non-state supply chains

Stage 2 (Higher Risk)

Higher Risk Workplaces

- Destination retail, including shopping malls and swap meets.
- Personal services, limited to: car washes, tanning facilities, all landscape gardening, etc.
- Office-based businesses (telework remains strongly encouraged)
- Dine-in restaurants (other facility amenities, like bars or gaming areas, are not permitted)
- Schools and childcare facilities
- Outdoor museums and open gallery spaces

Reinstituting Measures

Triggers for adjusting modifications.

Metrics that would serve as triggers for either slowing the pace through Stage 2 or tightening modifications.

Looking Ahead in Imperial County

Stage 3: Higher Risk Workplaces

Opening higher risk environments with adaptations and limits to gatherings (e.g., movie theaters, religious services, & more personal & hospitality services)

Stage 4: End of Stay-At-Home Order

Reopening highest risk workplaces with all criteria satisfied once therapeutics have been developed (e.g., concerts, conventions, sports arenas)
